

The Evolution of High Definition Technology

1288 HD 3-Chip® Camera

As the third generation in Stryker's HD 3-Chip® camera line, the 1288 HD 3-Chip® Camera features a 1920x1080p resolution along with nine specialty settings, resulting in optimum color resolution and brightness. Additional benefits of the 1288 HD 3-Chip® Camera include wireless transmission capabilities, four fully programmable buttons on the camera head, HD and HDTV outputs, and a touch screen LCD interface for easy navigation. By allowing for backwards compatibility with past generation digital capture devices, scopes and various flat panels, while also offering future capabilities with an optional fiber optic board, the 1288 HD 3-Chip® Camera continues to offer new solutions for improved visualization within the OR.
